this note is a user s manual for the dignad toolkit an application aimed at facilitating the use of the dignad model debt investment growth and natural disasters by economists with no to little knowledge of matlab and dynare via a user friendly excel based interface dignad is a dynamic general equilibrium model of a small open economy developed at the international monetary fund the model can help economists and policymakers with quantitative assessments and policy scenario analysis of the macrofiscal effects of natural disasters and adaptation infrastructure investments in low income developing countries and emerging markets dignad is tailored to disaster prone countries which typically are small countries or low income countries that are particularly exposed to large climate shocks countries where shocks that can disrupt the entire economy are frequent however dignad can be relevant also for larger countries that may potentially be exposed to extreme climatic disasters in the future

this user manual discusses the operational aspects of the macroframework foundations tool mft a multi sector macroeconomic framework for forecasting and policy analysis developed by the imf institute for capacity development icd mft 1 0 is the basic version of the mft while the tool is being further developed to incorporate more features the structure of the mft is based on the standard four sector framework of the financial programming and policies fpp developed and used by imf staff but it is simplified by adopting greater sectoral aggregation and requiring less data different from the standard accounting based fpp framework the mft uses behavioral equations for generating projections and incorporates explicit feedback loops between variables across sectors the mft is a simple but powerful tool to produce consistent

macroeconomic projections from accounting and economic perspectives and it could be extended to incorporate a longer projection horizon greater sectoral details and different policy environment the mft is not a ready to use tool because it needs to be built and customized to a specific country and this user manual and the accompanying excel template could guide that process

with this work users can learn how to use each of the office 2000 applications with complete coverage of all user oriented features the book targets beginner to intermediate home and business users

this practical guide presents all the features of the microsoft outlook 2007 e mail application after becoming familiar with the application s working environment you will then learn how to send and receive all types of messages and personalise your mail box message format signatures junk e mail filters etc the third section teaches you how to use the calendar for managing your appointments meetings and events you will then learn about all the other folders in outlook contacts tasks notes and the journal the last section teaches you how to use the all the features you will need for managing the different items that can be created with outlook

in 2002 rand project air force studied the data systems used by the air education and training command aetc to manage training costs and capacities the schoolhouse model developed to inform policy decisions regarding technical training pipeline issues grew out of this study the model examines resources used and training limitations encountered during the execution of a training program at the same time the aetc studies and analysis squadron sas built a similar set of planning and execution assessment tools rand and aetc sas agreed to combine the schoolhouse portion of their efforts into one model the purpose of this report is to provide front end users of the schoolhouse model with a reference for collecting and implementing data it also briefly describes the simulation model and its uses the model is potentially useful for evaluating changes in production and resources highlighting resource bottlenecks providing insight into classroom details such as

empty seats and the rate of individuals who prove ineffective in training and changes in production resulting from changes in resources course syllabi and washback and attrition rates
